Introduction

This user manual is designed by MetaOption LLC to give a brief account on GOIS-Pro. This guide is intended to provide information related to account setup & its management, subscription plans, and technical support on android/iOS platform offered by MetaOption LLC to its clients.

'Goods Order Inventory System' (GOIS) Pro is a highly sophisticated Web & Mobile application designed specifically to address the inventory management needs of SME moving up on the growth curve.

For more information on GOIS-Pro, please visit our web-site

<https://www.goodsorderinventory.com>

Account Activation Process

Manage your business inventory over cloud using Goods Order Inventory System – PRO mobile app.

User Registration

1. Download Goods Order Inventory System – PRO app from respective app store for Android and iOS devices.
2. Open GOIS-PRO mobile application on your device.
3. Click on 'New User' given at bottom right corner of the screen.
4. Fill in the registration form with all necessary details and register.

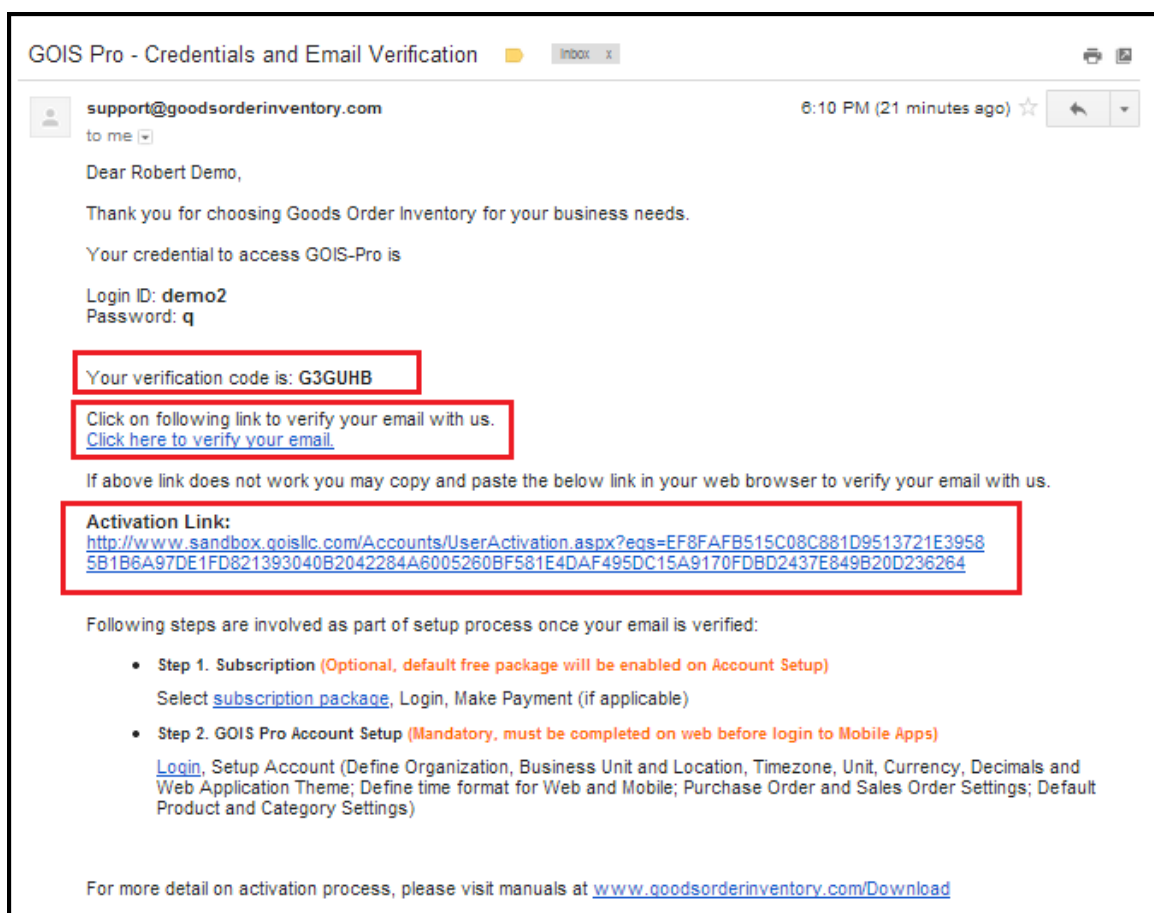

Figure 1: User Registration Page-Device app

The figure displays two screenshots of the GOIS-PRO mobile application. The left screenshot shows the login page with the following elements: a logo at the top, a 'Login ID:' field, a 'Password:' field, a 'Login' button, a 'Remember me' checkbox, and a 'New User' link circled in red. The right screenshot shows the registration page with the following elements: a 'Back' button, a 'Registration' title, a 'Help' link, and several input fields: 'Email ID:', 'Confirm Email ID:', 'Phone*' (with a dropdown for 'Country code*'), 'Industry*', 'How do you came to know about us*', and 'Referral /Reseller Code:'. Below these fields are sections for 'Set Login Information' (with 'Login ID:', 'Password:', and 'Confirm: Retype Password' fields) and 'TERMS AND CONDITION' (with an 'Accept Terms & Conditions' checkbox and a 'Read >' link). A 'Register' button is at the bottom.

Confirmation e-mail

- An acknowledgement email along with activation link and login credentials will be sent to the user's registered email.

Figure 2: Account Confirmation Page

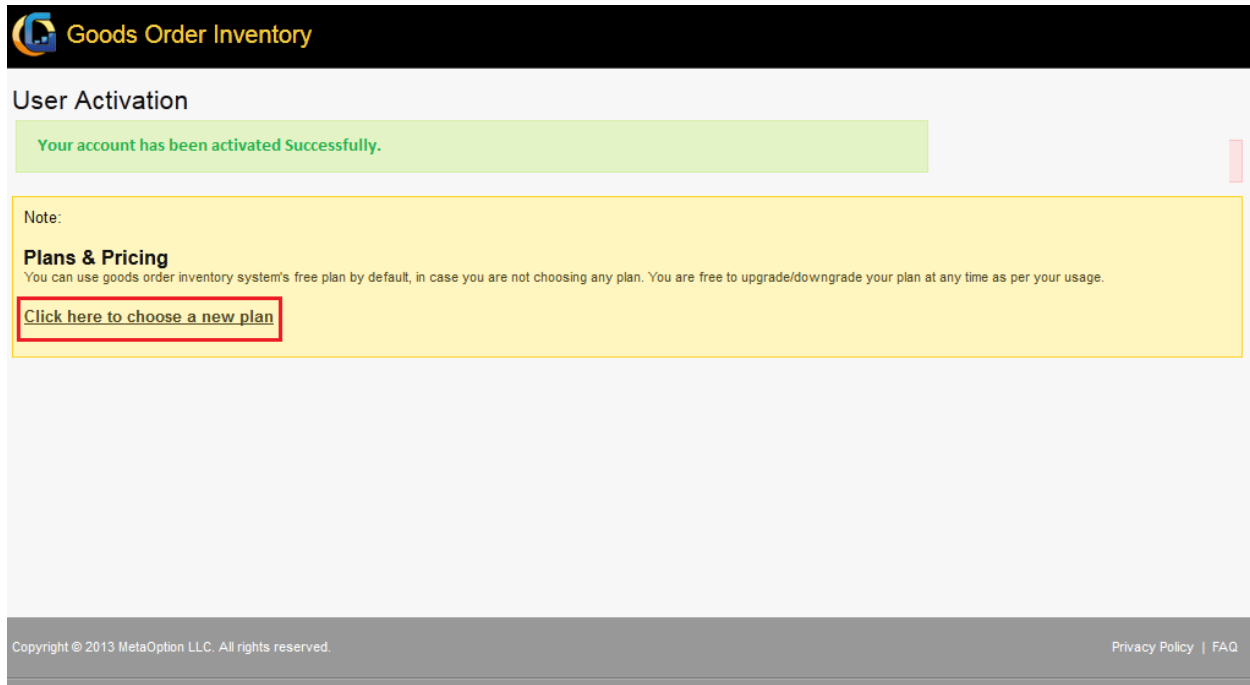

- Click on the account activation link to activate your account.
- After successful activation of your GOIS-PRO account, you need to login either into the web application or on the mobile application to setup your account (one time process).

! Check your spam/junk folder in case you didn't received mail in inbox.

User Activation:

- After successful account activation, user will be associated with free plan (by default).
- As per the individual's business requirement, you are given an option to subscribe for paid service as well, under *Pricing & License*.

Figure 3: User Activation Page

Pricing & License

As per your business requirement, choose the best suited inventory plans from the list of available plans.

1. Click on the link *Pricing & License*.
2. Choose the desired plan from the list of available options of GOIS-PRO plans and go ahead with continue button.

! Supported platforms (iPad, iPhone, Android Smartphones, Tablets, Web)

! Contact GOIS Support to know more about Pricing & Licensing or to customize your large plans having more business requirement/limits.

Note:

- Supported Devices (iPhone, iPad, Android Phone, Android Tablets), View Complete List of Supported Makes and Models
- If you are using one of the unsupported devices we strongly recommend you to sign-up with free plan and ensure GOIS Pro is working on your device before you buy paid subscription.
- Apple iOS App (iPhone and iPad) is pending review with iTunes. If you are looking to use GOIS Pro only on your iOS devices, we recommend you check back in few days. If you are looking to use Android Devices and Web Interface of GOIS Pro we encourage you to sign-up. As soon as iOS app become available we will notify you.
- For higher plan please contact customer support at support@goodsorderinventory.com

Customer's sensitive payment information is stored with Authorize.Net payment gateway. Data communication between devices, GOIS Server, and Authorize.Net is happening on 256-bit SSL (Secure Socket Layer) encryption for advanced security.

3. You will be redirected to 'Login Screen'; after clicking on 'Continue'.

4. Login with your credentials under 'Existing User (Business Owner)' section.

Customer's sensitive payment information is stored with Authorize.Net payment gateway. Data communication between devices, GOIS Server, and Authorize.Net is happening on 256-bit SSL (Secure Socket Layer) encryption for advanced security.

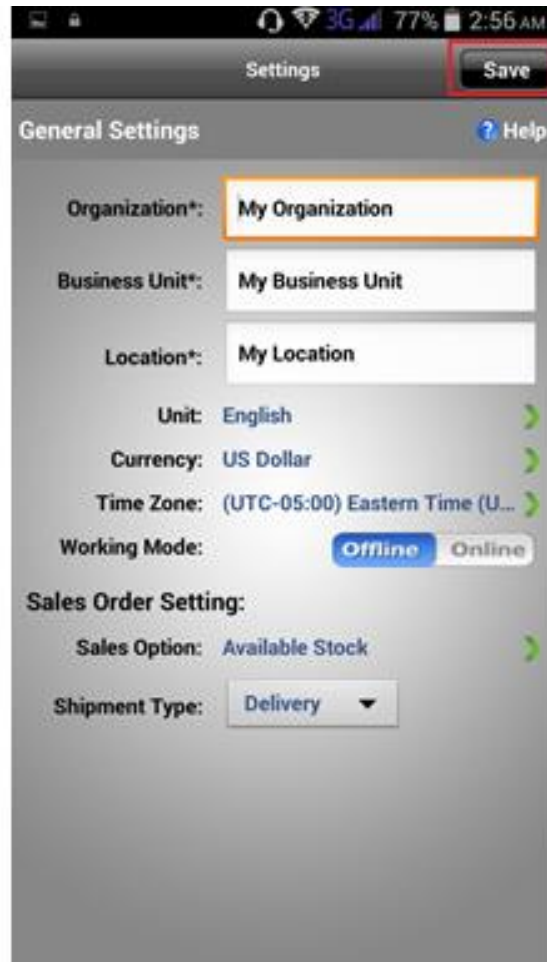

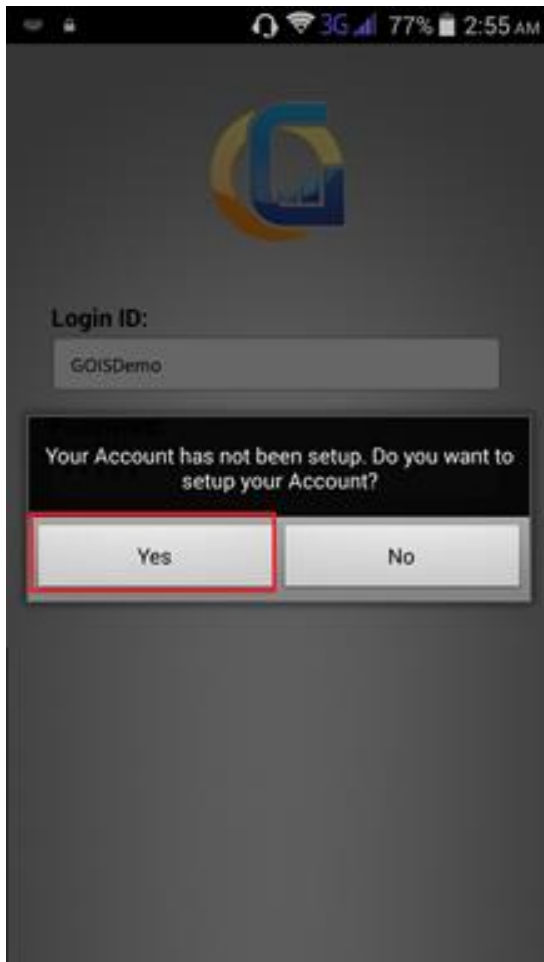

- After desired selection of payment option, you may go ahead by clicking on “Continue” button. Now user will be redirected to order confirmation page. After reviewing of order, user needs to click on “Confirm & Place Order” to make the final payment.
- An ‘Order Confirmation screen’, stating the transaction number of payment will be given to the user for future reference with an order status.
- An order confirmation mail will be sent to user’s registered e-mail as an acknowledgement.

! A user can use/login GOIS-Pro android or iOS device app after completing the account activation process on web.

Account Setup

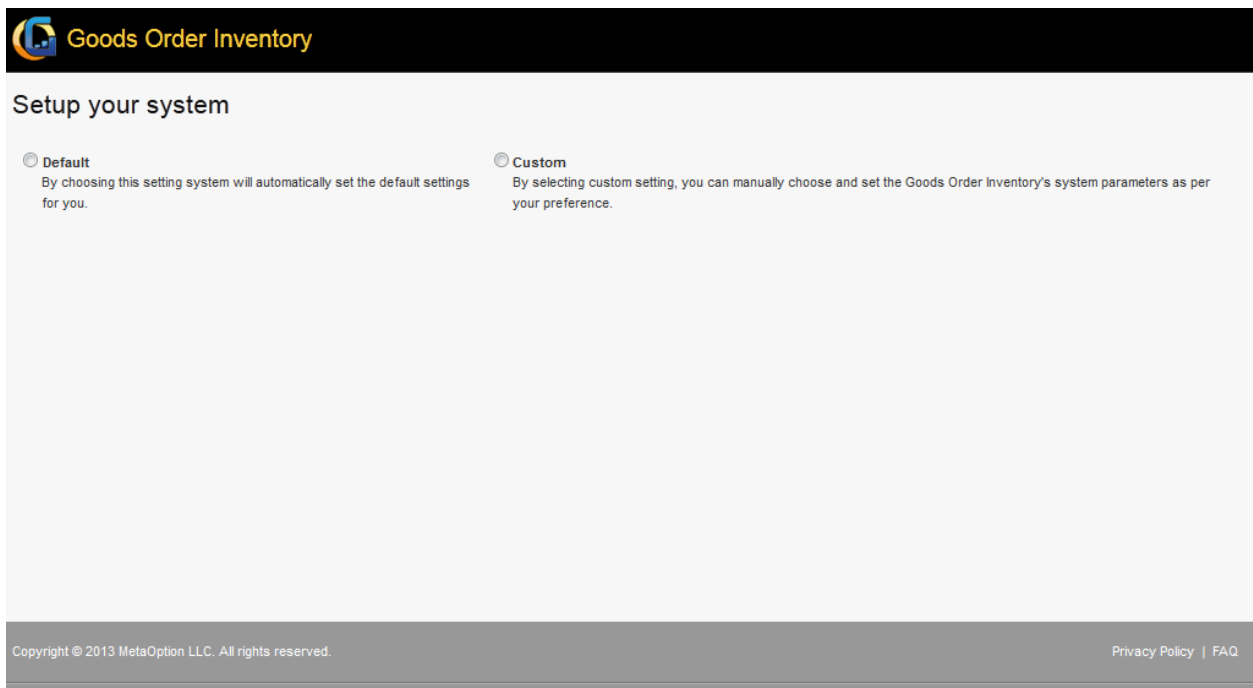

You will be redirected to 'Initial Account *Setup Process*' after signing in for the first time to your GOIS-Pro account (either from web or from mobile app).

Initial Setup Screen – Mobile App

- Based on your business preferences, manage your account settings either with Default or custom interface.

Figure 7: Setup your system (Web interface)

Default Setup

Default settings will allow system to automatically initialize all the system variables against factory settings (default settings) without any user intervention. This prebuilt system offers client the standard specifications to suite the business requirement.

Custom Setup

Other option allows you to customize your desired system settings as per as your business requirements.

Manually set the parameters for Goods Order’s inventory system as per business requirements. Fill all the required fields’ details to create a user centric business system.

Lists of classified tabs are provided to help user fill the data in systematic manner.

General Settings:

This tab is meant to provide general information pertaining to organization and other geographical information related to client’s site.

1. **Organization:** Provide information related to your organization name in this field.
2. **Business Unit:** Fill this space with your default business unit within the default organization name.

3. **Location:** Provide information about your inventory system and warehouse location under this tab.
4. **Time Zone:** Set the time zone as per your business location.
5. **Unit Type:** Set the standard measurement unit type. User will be given an option to choose either 'English' or 'Metric' as the default measurement unit type.
6. **Default Unit:** This option will allow user to select the desired default unit on the basis of unit type being chosen by user.
7. **Currency:** Manage your organization currency under this tab.
8. **Quantity Decimal Scale:** It represents the decimal digits of a quantity. For example: 10.09 liters. Here the decimal number is .09. So the quantity decimal scale is 2.
9. **Price Decimal Scale:** It represents the decimal digits of a product price. For example, a good costs \$ 30.06. So here, the price decimal scale is 2.
10. **Select Theme:** Select and choose desired color theme for your GOIS account.

Refer figure 8 for in-depth understanding of General settings.

Purchase Order Settings:

Purchase order settings allows user to define their desired purchase order number format for their business by providing the necessary information.

1. Order No's Prefix: Insert prefix before purchase order number so as to comply with standard business series for all the purchase orders.
2. Order No's Suffix: Insert letter or digits as suffix after purchase order number so as to comply with purchase order number.
3. Separator: Add separator lines between prefix, purchase order number, and suffix. Separator helps user in identifying important orders from the list of purchase orders.

4. Padding On/Off: This tab is meant to provide padding character to maintain your inventory in an efficient manner. Choose 'Left' or 'Right' as padding type by adjusting your padding settings.
5. Padding Character: Select padding character from drop down box. Choose '0' as default character or any other special character mentioned in drop box as per your inventory needs.
6. Order No. Length: Set standard length ranging from 3 digit numbers to 20 digit numbers for your purchase order number.
7. Order Start Number: Insert numerical digits to set a standard purchase order number series.

! Order number digits cannot exceed order number Length.

8. Increment: Set incremental series for your purchase order number.

Sales Order Settings:

Set customized rules for stock adjustment and goods shipment management. Under this link, a user has to fill all the information related to goods sale.

1. Sale Option: Select the best sales option which suites your business inventory requirements.

Figure 11: Sales Option Screenshot

The screenshot shows a settings panel titled "More Settings". It contains three main sections:

- Sale Option:** A dropdown menu with the selected option "Sale using product's total stock available at a locati".
- Stock Adjustment Rule:** A list of three options:
 - Sale using product's total stock available at a location. Stock adjustment rule will be applied.
 - Sale using product's individual stock entries available at a location.
 - Sale using the Product List without using the Inventory..
- Default Shipment Type:** A dropdown menu with the selected option "Delivery".

At the bottom of the panel are two buttons: "Previous" and "Next".

- *Sale using product's total stock available at a location. Stock adjustment rule will be applied:* It will allow user to sell the selected item from the total available stock in a warehouse/location i.e. for each item only one entry will be shown to user for ordering the quantity from total stock quantity (irrespective of number of stock entries exist for a particular item in a location, system will show the total quantity). Stock adjustment rule will be applied to deduct your inventory on the basis of your selection (LIFO or FIFO).
 - *Sale using product's individual stock entries available at a location:* This option allows users to choose a particular stock entry to be sold against a given product available at a selected location to be sold.
 - *Sale using the product list without using the inventory:* Sell your goods directly from the product list without using or having the stock in your inventory. Inventory tracking is not applicable in this case.
2. Stock Adjustment Rule: Inventory deduction against a sale can be defined either with FIFO or LIFO method.

Figure 12: Stock Adjustment Rule Screenshot

More Settings

Sale Option: Sale using product's total stock available at a locati

Stock Adjustment Rule: Use oldest stock first. (FIFO) First In First Out meth

Default Shipment Type: Delivery

Previous **Next**

- *Use oldest stock first. (FIFO) First in First Out method:* Manage your inventory by FIFO. It allows a user to sell the oldest item first, thereby, maintaining the new items in the inventory.
 - *Use newest stock first. (LIFO) Last in First Out method:* Sell your newest stock first, thereby, maintaining the old items in inventory for future selling.
3. **Default Shipment Type:** This option allows user to choose the shipment mode for your sales orders. You have options to choose either 'Delivery' or 'Pickup' mode as per your business requirement.

Purchase Orders

Purchase order section allows a user to create and manage list of purchase orders raised for different vendors and to order desired items for the fulfillment of your inventory.

Figure 46: Purchase Order Screen

Add Purchase Order

1. From the 'Home' screen of device app, click on 'Purchase Order' icon to navigate to Purchase Order listing page.
2. Click on the (+) icon given at top right corner of screen.
3. 'Add Purchase Order' window will pop-up.
4. Fill the required information under given tabs 'Info' and 'Line Items'.

Info Tab

- *Order Number:* Order number will be generated automatically depending on the settings saved in GOIS-Pro web account by the business owner.
- *Location:* Choose a location/warehouse for which you are creating a purchase order.
- *Order Status:* Manage/track/Set a desired order status for your purchase order created for a vendor.
- *Priority:* Set the purchase order priority as per your business needs. User can place their priority ranging from Low to medium to high upto immediate.
- *Discounts & Taxes:* Set discounts and taxes for an order.
- *Vendor:* Assign vendor to a purchase order.
- *Associated Contacts:* Vendor associated contacts will be automatically updated in directory.
- *Order Date:* Assign order date for your purchased order.
- *Requested Delivery:* Set the purchased order delivery date.

- *Note:* Add purchased order notes under this tab.

Figure 47: Info-Purchase Order Page

The screenshot shows the 'Info' tab of the 'Add Order' page. The 'Info' tab is highlighted with a red box. The page displays the following information:

- Order Number: 0
- Location*: Oakland
- Order Status: New Order
- Priority: Low
- Discount & Taxes: Select
- Vendor: Select
- Associated Contacts: 0
- Order Date*: 10/31/13 06:40 AM
- Requested Delivery*: 10/31/13 06:40 AM

Below the list is an 'Order Note' section with a text input field labeled 'Enter note upto 500 characters'. At the bottom, there are three buttons: 'Save', 'Fulfill All', and 'Cancel'.

Line Items

Add, scan and fulfill your purchase order line items by providing the necessary information under 'Line Items' tab.

➤ *Add*

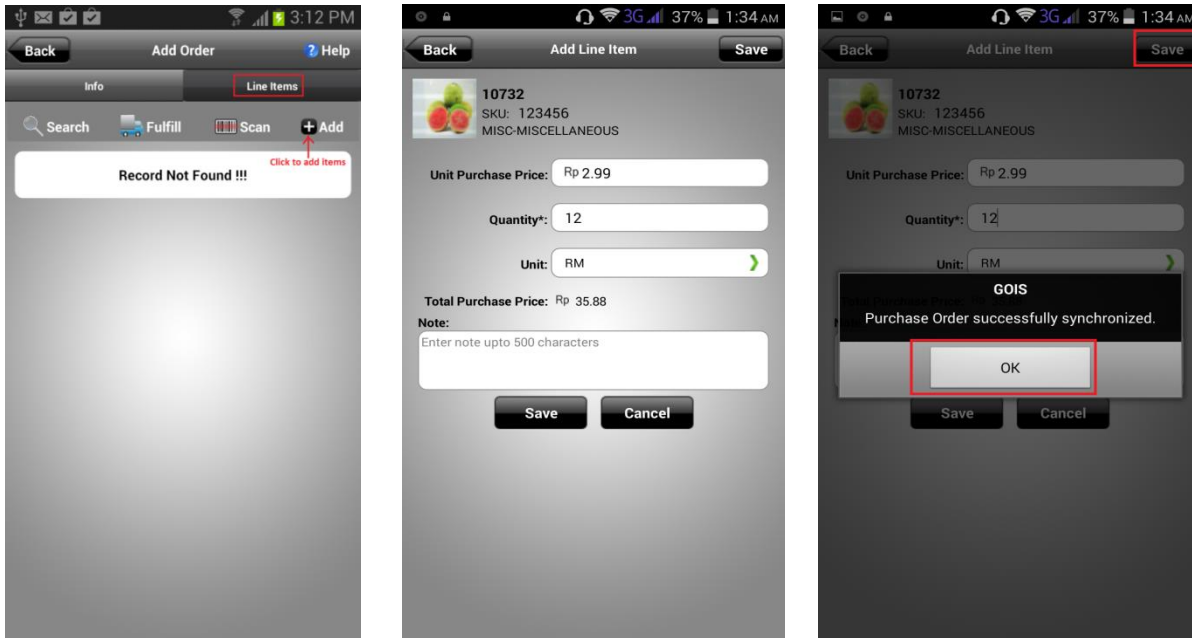

1. Click on the '+Add' button mentioned at top right corner of 'Line Items' screen to choose the item(s) from product list to be purchased.
2. User will be redirected to 'Products list' section.
3. Select desired product, specify product purchase price per unit, quantity to be ordered and measurement unit.
4. Click on the 'Save' to add item in an order.
5. Repeat steps 1 to 4 to line up/order multiple items.

➤ *Scan:* Add line items directly by scanning the product's barcode.

1. Click on the 'Scan' icon given under 'Line Items' screen.
2. On clicking to 'Scan' icon, your mobile rear camera will get activated to allow scanning to barcode.

3. Keep the mobile rear camera horizontally over the barcode, barcode will be detected if mapped with a product and will populate the relative information.
4. Provide product purchase price per unit, quantity to be ordered and measurement unit. In case no barcode is available or detected for a product under manage product list, you will be redirected to add product section to add that barcode in your business product list.
5. Click on 'Save' to add the line item.

Figure 48: Line items-Purchase Order Page

- *Fulfill icon/button:* After adding the line items in a purchase order, user may fulfill the desired items by selecting them and clicking on 'Fulfill' button.
- *Search/Sort:*
 1. Click on the "Search" icon given at top left corner of screen under 'Add Order' screen.
 2. On clicking, search bar will be displayed.
 3. Perform desired searching and sorting.

Update/Edit Purchase Order

1. Go to 'Purchase Order' Section given on Home screen.
2. Select the desired purchase order by tapping on it and modify the 'Purchase Order' information you want to update under 'Info' and 'Line Items' tab.
3. Save the updated detail.

Fulfill Purchase Order

Fulfill a purchase order 'fully' or 'partially' depending upon your inventory needs.

Fulfill All

This will fulfill the whole purchase order (all the items lined up in an order will get fulfilled at once).

1. Navigate to 'Purchase Order' section.
2. Select desired purchase order to be fulfilled.
3. Edit Order window will be pop-up.
4. Click on 'Info' tab.
5. Check the provided information under 'Info' tab.
6. Click on 'Fulfill All' button present at the bottom of the screen.
7. Click on 'Yes' when system ask for conformation.

Figure 49: Fulfill All-Purchase Order

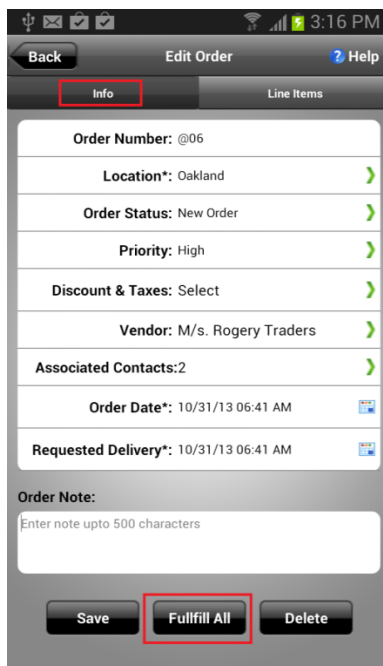

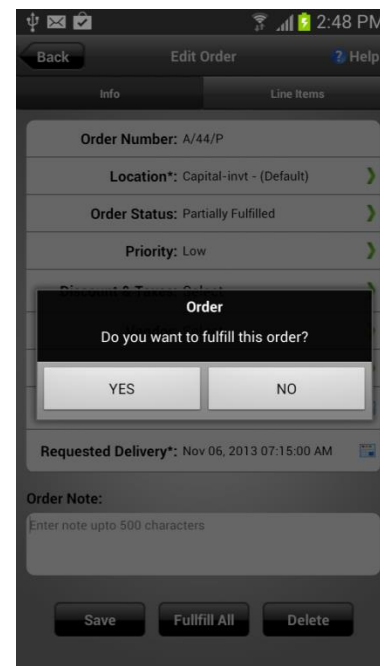

Figure 50: Fulfill All Confirmation Page

Partial/Fully Fulfill:

1. Navigate to 'Purchase Order' section.
2. Select desired purchase order to be fulfilled.
3. Go to 'Line Items' tab, present under 'Edit Purchase Order' screen.
4. All ordered items will be displayed under this section.
5. Click on the radio button against the desired 'item' you want to fulfill.
6. Click on 'Fulfill' icon given on the top grid under Edit Order – Line Item tab.
7. System prompt a message for the confirmation – say 'OK'.

8. Check or modify the unit purchase price, unit sale price and quantity to be fulfilled under this screen.
9. Now click on either 'Fulfill' or 'Fulfill and Close'.

➤ *Fulfill:*

- This provides user an option to move forward with partial quantity, letting user to fill the remaining quantity at later date.
- Order will remain in 'Partially Fulfilled' state until you fulfill complete ordered quantities.
- Click on 'Fulfill' to find the fulfilled quantities in your inventory.

➤ *Fulfill & Close:*

- This option is meant to close the order immediately whether user fulfilled all the ordered quantities or fulfilling the partial quantities of a purchase order.

4. Select any purchase order item you want to fulfill for your stock and proceed.

Figure 68: Receive Delivery

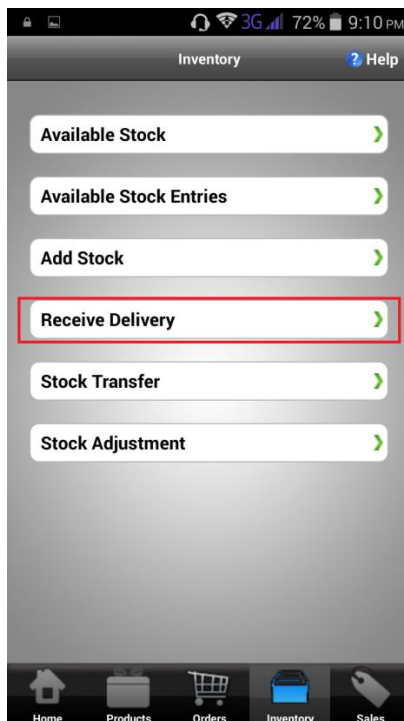

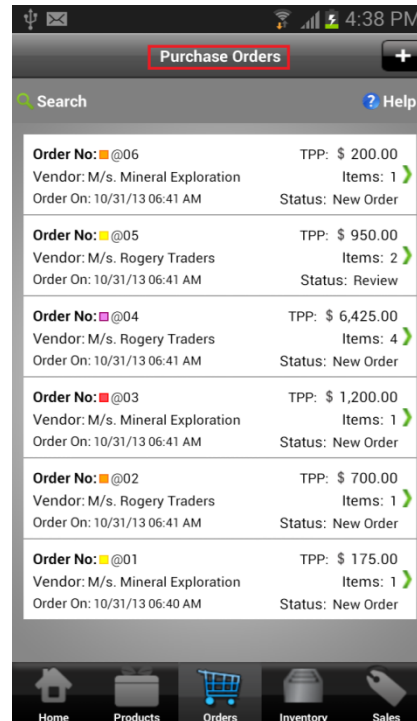

Figure 69: Purchase Order Description

Transfer Stock

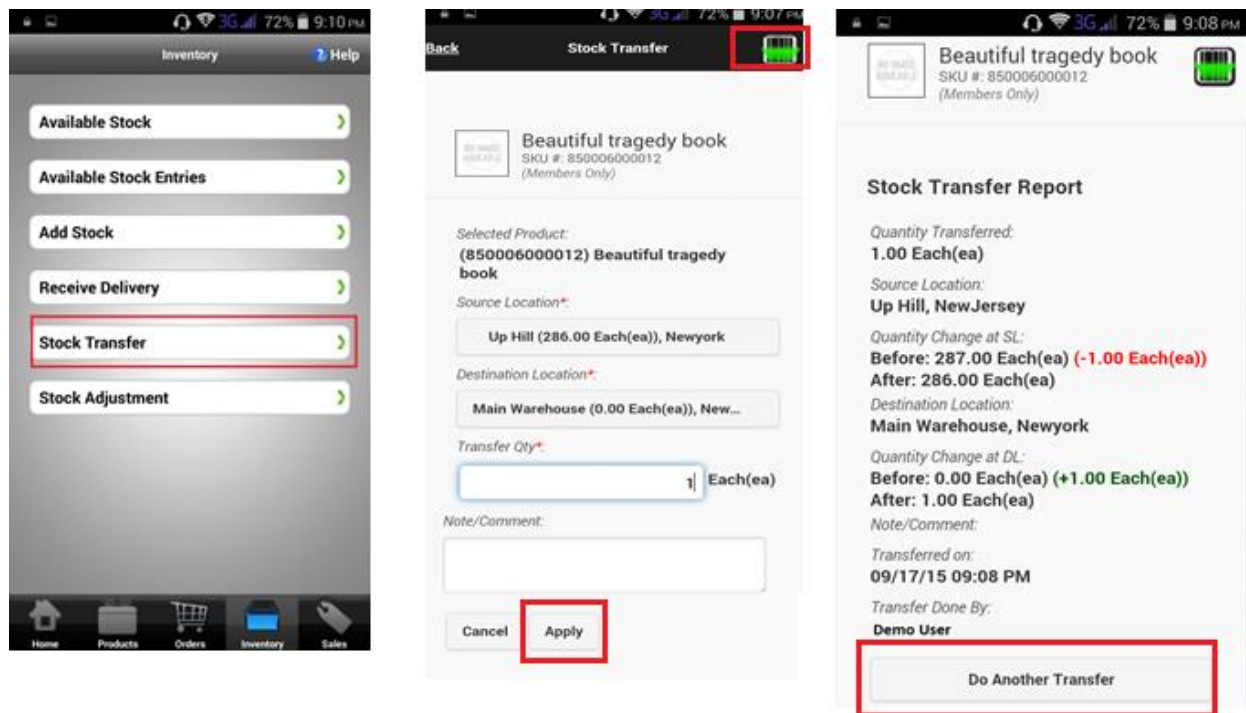

GOIS allows user to make necessary stock transfer from one location to another.

Steps to Transfer Stock from one location to another location:

1. From the 'Home' screen, click on 'Inventory' icon.
2. Tap on the Stock Transfer tab.
3. Now system will check whether the data is synchronized with web server or not and will prompt to sync the data. Choose Yes for data syncing.
4. Now, system will be navigated to 'Stock Transfer' screen having a list of inventory items for the selected location. User may change the source location by selecting the given 'Location' field on the page.

5. Select a product you want to transfer from selected source location and you will be navigated to product detail page (Stock Transfer).
6. Provide the 'Destination Qty', Qty. to be transferred and Transfer Note.
7. Click on Apply to process the transfer from 'Source' location to 'Destination' location.
8. System will generate a pop-up asking for the user confirmation to perform this action. Tapping on Ok button will create a new pop-up showing the success message of the transfer with details.

Figure: Inventory - Stock Transfer

Adjust Stock

GOIS allows a user to make necessary stock adjustments in a location/warehouse against damaged, missing, stolen and returned items.

Steps to make Stock Adjustments in a location:

1. From the 'Home' screen, click on 'Inventory' icon.
2. Tap on the Stock Adjustment tab.
3. Now system will check whether the data is synchronized with web server or not and will prompt to sync the data. Choose Yes for data syncing.

4. Now, system will be navigated to ‘Select Product’ screen having a list of inventory items for the selected location. User may change the location by selecting the given ‘Location’ field on the page.
5. Select a product you want to adjust for selected location and you will be navigated to product’s stock entries screen (Stock Adjustment).
6. Select a stock entry to be adjusted.
7. Provide Adjustment method, Adjustment Qty, Adjustment reason, Adjustment note and hit ‘Apply’ button.
8. System will prompt a popup message for the confirmation, say Ok.
9. Now a successful message will be shown to the user, say OK.
10. Tapping on the Ok Button will redirected to another page showing the details related to the adjustment, this page also contains a “Do Another Adjustment” button user can tap on this for more transactions.

 3. Perform desired Searching/ Sorting using this feature.

Customer Details

Add your customer details in a sales order using this tab.

- *Select/Modify Customer:* Choose/Modify customer as per your business needs.

- Click on ‘Select Modify Customer’ link.
 - ‘Customer list’ will be displayed.
 - Select desired customer to add under a sales order.
- *Remove Customer:* Click the ‘Remove’ link to remove the customer details assigned in a given sales order.
- *Customer Information:* Customer’s detailed information related to contact info, billing address, and shipping address will be displayed under this section.
- *Customer Preference:* Set customer preferences.
- Shipment Type (Delivery or Pick up).
 - Requested Delivery On.
- *Delivery Location:* Location from where the inventory will be deducted.
- *Customer Instructions* (If any).

Click on ‘Save’ button to save the customer information.

Figure 73: Customer Details Page

The screenshot shows a mobile application interface for 'Sales'. At the top, there are navigation options: 'Back', 'Sales', and 'Help'. Below this, there are three tabs: 'Info', 'Line Items', and 'Customer Details' (which is active). Under the 'Customer Details' tab, there are two buttons: 'Select/Modify Customer' and 'Remove'. The main content area is titled 'Customer Information' and has three sub-tabs: 'Contact Info', 'Billing Address', and 'Shipping Address' (which is active). The 'Contact Info' section displays: Name: Richard Feraro, Email: richarf.feraro@yahoo.com, and Mobile: +91 9632589856. The 'Customer Preferences' section includes a 'Shipment Type*' dropdown menu set to 'Pickup' and a 'Req Delivery On' date/time picker set to '10/31/13 07:21 AM'. The 'Pickup Location' section has a text field containing 'MaryLand'. The 'Customer Instruction' section has a text area with the placeholder 'Enter Instruction upto 250 characters'. At the bottom, there are three buttons: 'Save', 'Dispatch & Close', and 'Delete'.

Dispatch Sales Order:

Dispatch a sales order from ‘Info’ or ‘Customer details’ tab given under a Sales Order.

1. Go to ‘Sales Order’ section present on Home screen.
2. Select any order from ‘Sales Orders List’.
3. Click on ‘Info’ or ‘Customer details’ tab.

4. Click on 'Dispatch & Close' button given at the bottom of the screen.
5. Your order will be dispatched and will go to close order details section of report.

Figure 74: Sales Order-Dispatch & Close screen under Customer Details tab

The screenshot displays a mobile application interface for managing sales orders. At the top, there is a navigation bar with 'Back', 'Sales', and 'Help' options. Below this, there are tabs for 'Info', 'Line Items', and 'Customer Details', with 'Customer Details' being the active tab. A red box highlights the 'Select/Modify Customer' and 'Remove' buttons. The main content area is divided into sections: 'Customer Information' with sub-tabs for 'Contact Info', 'Billing Address', and 'Shipping Address'; 'Customer Preferences' with a 'Shipment Type*' dropdown set to 'Pickup' and a 'Req Delivery On' date field set to '10/31/13 07:21 AM'; 'Pickup Location' with a text field containing 'MaryLand'; and 'Customer Instruction' with a text area for entering instructions up to 250 characters. At the bottom, there are three buttons: 'Save', 'Dispatch & Close', and 'Delete'.

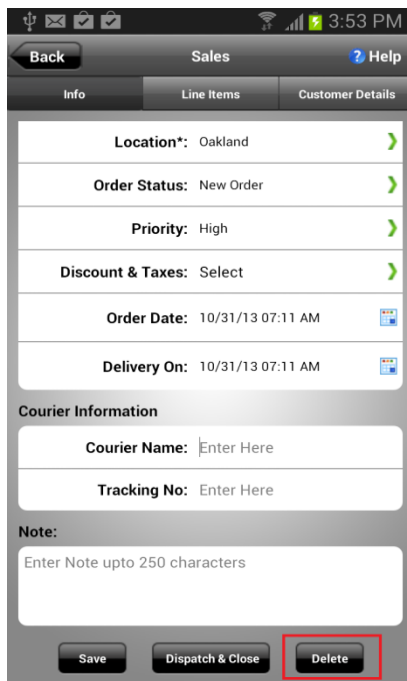

Update Sales Order:

1. Go to 'Sales Order' section given on 'Home' screen.
2. Tap on desired sales order you want to edit and modify the sales order information you want to update.
3. Save the updated detail.

Delete Sales Order:

1. Go to 'Sales Order' section.
2. Select the order you want to delete.
3. Scroll down to bottom and click on the 'Delete' button.
4. System will prompt a confirmation message, choose 'Device & Server' to delete a sales order.
5. On clicking, the selected sales order will be deleted.

Search/Filter/Sorting

1. Click on the “Search” icon given on top left corner of ‘Sales Order’ screen.
2. Search bar will be displayed.
3. Search/ Sort/Filter your sales order list using this feature.

Figure 77: Sales Search Page

Quick Sales

To enhance the power of barcode scanning and creating sales, a new feature has been introduced that allows a user to create sales order more quickly using iOS and Android mobile devices.

Figure: Quick Sale Option

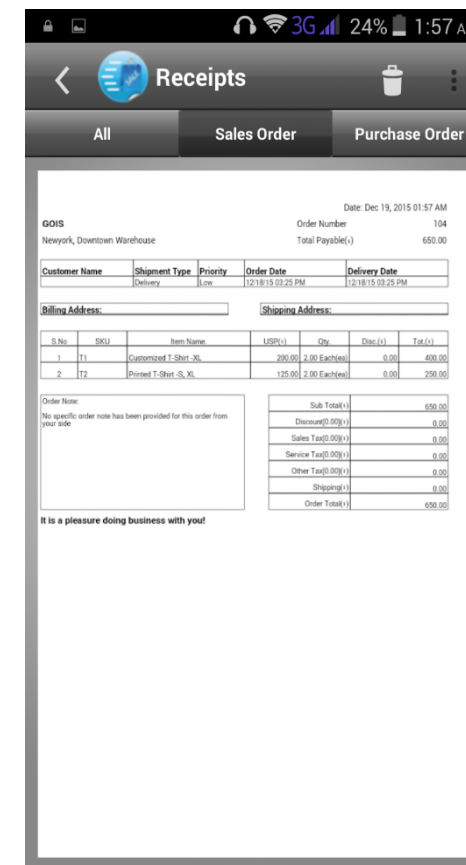

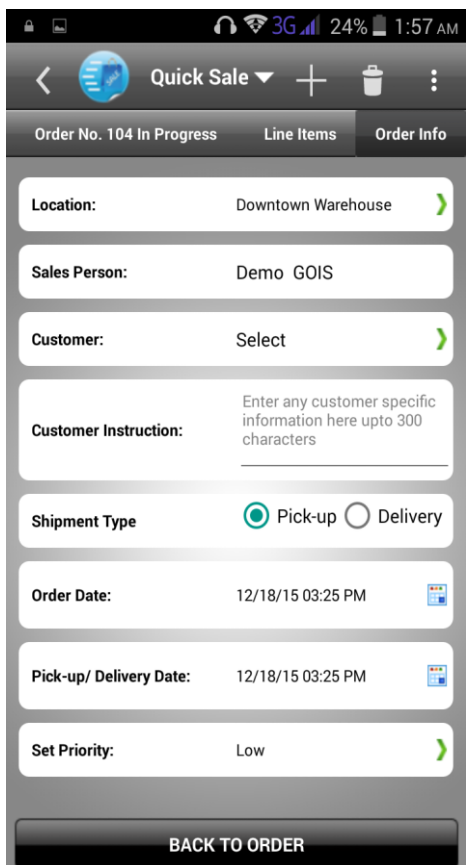

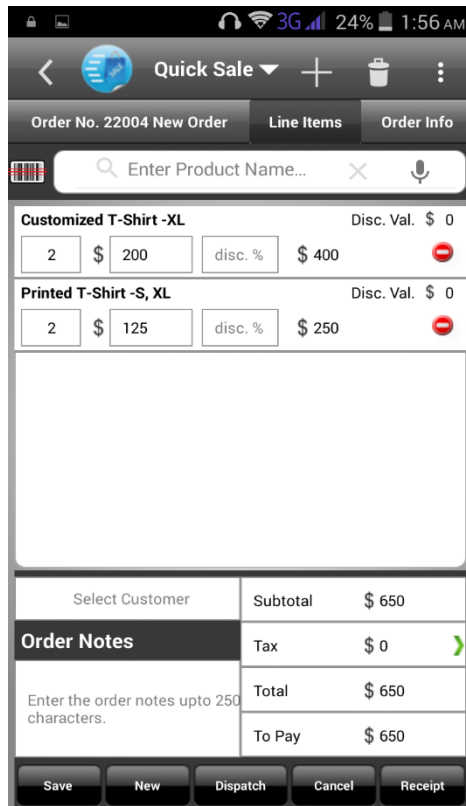

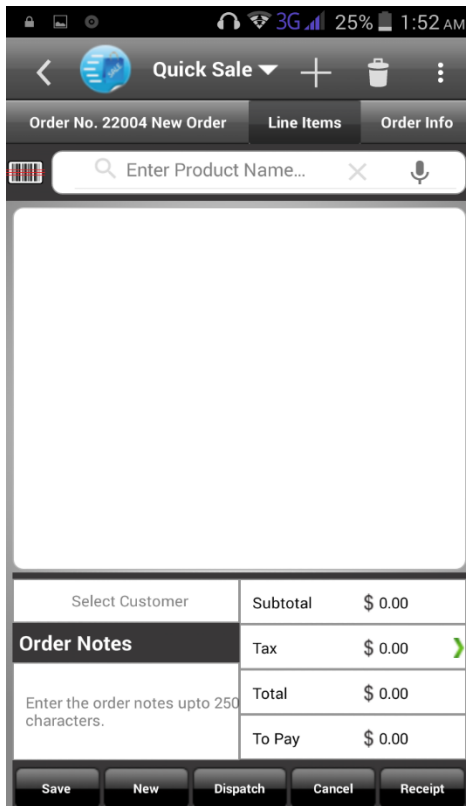

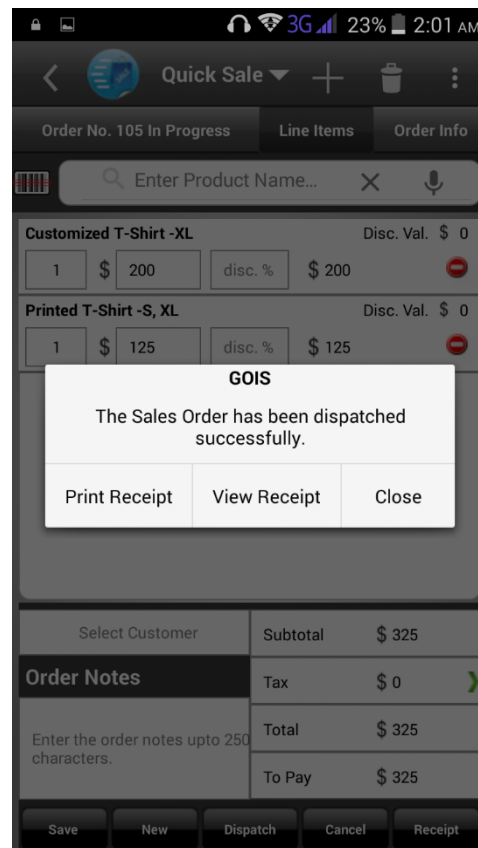

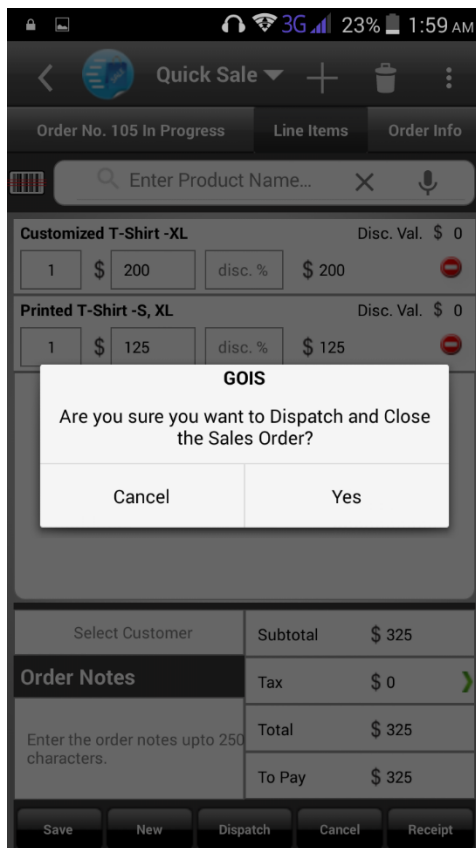

Create Quick Sale

1. Steps for creating quick sale order:
2. From the home screen, tap on Quick Sales icon.
3. User will be navigated to 'Quick Sale' creation screen.
4. There are two tabs as Line Items and Order Info.
5. By default, you will be redirected to Line Items tab.
6. New order number will be generated automatically.
7. To add the items, tap on the search field given.

8. Here user has two options as either enter the product name/SKU# manually to search a product to be lined up in an order for sale or tap on barcode icon given adjacent to search field.
9. On tapping the barcode icon given adjacent to search field, device rear camera will be activated automatically.
10. Keep the camera horizontally over the barcode, the barcode will be captured and the corresponding product line will be populated.
11. If you like to search a product manually (without using barcode scanning feature), just type the product name or SKU number under the given search box.
12. Enter the quantity to be sold, modify the sale price (if necessary) and mention the discount (if applicable for a given product).
13. Line up any desired items in an order.
14. Choose the customer under 'Select Customer' field.
15. Enter order notes – if needed.
16. Hit 'Save' button given at the bottom under horizontal grid.
17. Now tap on 'Order Info' tab.
18. Provide necessary information as needed.
19. Once done, tap on 'Back to Order' bottom from bottom grid.
20. If user like to dispatch the order immediately, click on 'Dispatch' from bottom grid under 'Line Items' tab.
21. Hitting 'Cancel' will cancel the order.
22. Hitting 'Receipt' button will generate the receipt of an order.

Quick Scan Web

“Quick Scan Web” feature allows a user to scan the product that has been saved on the web server and perform different quick actions on the product directly. This feature works in online mode of the mobile application as it has to fetch data from the web server. To avail this feature, user needs to tap on the icon with the name “Quick Action Web”. After tapping on this icon user will be asked to sync the data with web server, choose yes for data syncing and then you will be redirected to another page contains a ‘Search Box’ and ‘Scan Icon’.

Under the search box, user needs to provide either the SKU/Product number or the Product Name and accordingly product information will be populated.

If you have mapped the barcode with a product, you may tap on barcode icon given on top right corner of the screen to activate your mobile rear camera for scanning. Keep the mobile camera horizontally over the barcode, once barcode will be detected, corresponding product information saved into the GOIS server will be populated automatically.

View Detail

When the user types the SKU or the Product Name in the search box, the product matching the values given in the box will be appeared with product basic information. User can tap on the View Detail button to get all the detailed information about the specific product with single tap.

Product

Product tab under Product Detail page provides the general product information and Inventory stock information.

Quick Actions

When a user provides the SKU/Product Number or the Product Name in the search box or scans a product barcode under Quick scan web page, the product with the matching values appears below the search box and a Quick Action button will appear to allow you to perform different operations on web data directly.

After tapping on 'Quick Action' button, a pop-up will appear with three different options to perform different actions on a given product.

1. Adjust Stock
2. Transfer/Import Stock
3. View Product detail

Adjust Stock

GOIS allows a user to make necessary stock adjustments in a location/warehouse against damaged, missing, stolen and returned items.

Steps to make Stock Adjustments in a location:

1. Under the 'Quick Action' popup, tap on Stock Adjustment tab.
2. Now system will check whether the data is synchronized with web server or not and will prompt to sync the data. Choose Yes for data syncing.
3. A list of selected product stock will be displayed for a default location, tap on the location name field to select some other location or all locations.
4. After selecting a location, all related stock entries of a selected product will be filtered out, tap on "Enter ID" textbox to search for the specific stock ID.
5. Select a stock entry to be adjusted.
6. Provide Adjustment method, Adjustment Qty, Adjustment reason, Adjustment note and hit 'Apply' button.
7. System will prompt a popup message for the confirmation, say Ok.
8. Now a successful message will be shown to the user, say OK.
9. Tapping on the Ok Button will redirected to another page showing the details related to the adjustment, this page also contains a "Do Another Adjustment" button user can tap on this for more transactions.

User can have a look on all the details related/associated with a selected product. Refer View Detail section for more information.

Settings

Manage and customize your mobile application settings as per your business needs.

Download Settings

Click on this icon to download the latest settings and updates from GOIS-PRO web server created under your account.

General Settings

This section provides general information pertaining to organization and other geographical information related to client's site.

Organization:

Select the desired 'Organization' with which you want to work in your mobile application.

1. Click on given tab 'Organization'.
2. Select the Organization you want to work with.

Business Unit:

On the basis of selected 'Organization', Business Unit list will be populated for further selection.

1. Click on given tab 'Business Unit'.
2. Select the business unit you want to work with under your chosen organization.

Location:

Using this tab, choose a desired warehouse location you want to work with.

Unit:

Set the default measurement unit. User will be given an option to choose either 'English' or 'Metric' as the default measurement unit type.

1. Click on given tab 'Unit'.
2. To change default unit, click on default unit
3. A unit list will be populated.
4. Select a desired default unit.

Currency:

Manage your currency system under this tab.

- Currency will be displayed automatically; on the basis of defined organizational settings under web account.
- You can change the currency only from your “GOIS Pro web” account.

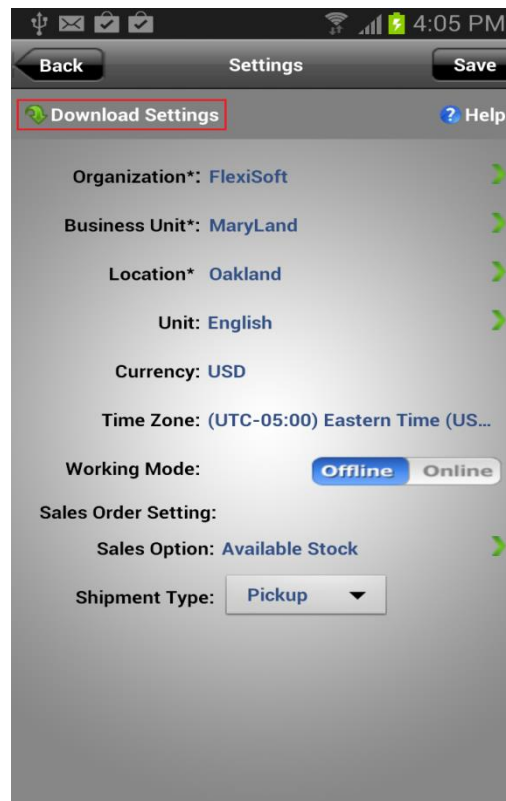

Time-Zone:

Time-Zone will be displayed on the basis of user profile settings defined under web account.

Working Mode:

1. Online mode: Synchronize your data with web server on real time.
2. Offline mode: Access and manage your account in offline mode without synchronizing it to web.

Figure 90: Settings Page

Sales Order Settings:

Set rules for stock adjustment and goods shipment management. Under this tab, a user has to choose all the information related to product/inventory sales.

1. Sale Option: Select the best sales option which suites your business inventory requirements.

- *Available Stock*: It will allow user to sell the selected product from the combined/total available stock list available in a warehouse/location. Stock adjustment rule will be applied to this type of sales. You can either select FIFO or LIFO based on your inventory maintenance needs.
- *Available Stock Entries*: This option allows users to sell from the individual stock entries against a given product available at a selected location.
- *Product List*: Sell your goods directly from the product list without using the inventory.
